ABSTRACT

This is a Latex template for extended abstracts.

Key Words: *Computational heat transfer, porous media, radiation.*

1. INTRODUCTION

Potential authors are invited to submit an extended abstract before **March 30, 2009**. Abstracts can be uploaded on the Conference website (www.thermacomp.com).

2. MAIN BODY

The abstract should outline the main features, results and conclusions as well as the general significance of the contribution. Please note that extended abstracts

- can only be accepted as .pdf files not larger than 1MB;
- must not exceed four pages;
- must be written in English.

Acceptance of abstracts will be communicated to authors by May 1, 2009. Accepted abstracts will then have to be uploaded in their final form.

3. RESULTS

The main results should be presented in a section of the paper. Relevant references, figures, and tables are welcome. An example of the format to be used for figures in extended abstracts is given in Figure 1. Please do use this same type of format in the abstract, and produce a high quality .pdf file. Authors who wish to include tables in their extended abstract should use the format provided in Table 1.

In the preparation of extended abstracts, authors are invited to follow the format provided on ThermaComp2009 site. Submitted Abstracts-Author.pdf file should therefore look like the example given in the file "AbstractTC2009.pdf" file that can be downloaded from this site.

4. SUBMISSION

Please note that all abstract (in a .pdf format) have to be uploaded on the thermacomp.com site. Authors need to login with their username and password, and submit their abstracts through the link "Your Submission form" available in their personal account web-page. Please note that in order to submit your paper you will need to click on the "SUBMIT" link at the bottom of the Submission form page.

5. CONCLUSIONS

Please note that the final acceptance of papers for presentation is conditional on one of the authors registering before July 31, 2009. Multiple presentations are only allowed for high quality papers. One presentation per delegate is allowed.
